

SunSaver Generation Differences

Abstract:

How to distinguish between new generation and previous generation SunSaver charge controllers.

New Generation SunSaver

- A bi-color Charging Status LED on the left side of the controller
- 3 LEDs (Green, Yellow, Red) for battery state of charge indication on the right side
- Includes a plastic terminal cover for UL certified installations

Previous Generation SunSaver

- A green Charging Status LED
- A red LED for load connect/disconnect indication (LVD models only)
- All LEDs are on the right side of the controller
